Summary

Full-Stack Developer with 4+ years of experience crafting innovative web solutions that enhance user engagement and operational efficiency. Proficient in developing responsive applications using Vue, React and JavaScript, with a robust understanding of RESTful APIs and modern development practices. Passionate about exploring new technologies and solving complex problems to deliver exceptional user experiences. Committed to maintaining the standards of code quality and practicing collaboration through active participation in code reviews and architectural discussions.

Work Experience

Full-Stack Developer at WebGurus, Odorheiu Secuiesc

May 2025 — Present

- Developed and maintained multi-tenant full-stack web application using Vue.js on the frontend and Node.js with TypeScript on the backend, enabling customers to provision branded instances of the platform with configurable themes, order types, and feature sets.
- Built and enhanced complex order flows including geolocation-based customer mapping (ZIP code & demographic filtering), highly customizable products, draft orders, cart functionality, and secure checkout.
- Delivered both customer-facing and admin portals deployed on Google Cloud Platform using Firebase services, including account management and administrative tools for product management, order processing, map management, and tenant configuration.

Front-End Developer, ServiceNow Developer at Combridge, Odorheiu Secuiesc

September 2023 — May 2025

- Develop and manage a ServiceNow customer portal using Angular and Bootstrap, ensuring a responsive and user-friendly interface.
- Implement internal product workflows such as ordering and service management, enhancing operational efficiency.
- Build a RESTful API enabling other teams to utilize multiple customer solutions, promoting seamless integration across platforms.
- Integrate third-party services to streamline operations and sync data across computer network systems, ensuring high performance and reliability.
- Participate in code reviews and architectural discussions to enhance code quality and maintainability

Front-End Developer at Minyma Technologies, Remote

December 2021 — August 2023

- Develop an AI-assisted learning tool that summarizes documents, takes bullet-point notes, offers semantic search, and includes a question-answering feature, improving user experience through innovative solutions.
- Build a text editor for organizing and formatting notes associated with different documents, focusing on user-centric UI development.
- Leverage websockets for real-time updates within the application, enhancing interactivity and responsiveness.
- Make key architectural decisions for both front-end and back-end development, contributing to the overall success of the projects.

- Develop a community marketplace for buying and selling NFTs on Ethereum, incorporating features such as video streaming and chat to enhance user engagement.
- Compose different parts of the application using micro-frontends, ensuring modularity and scalability.
- Utilize web3 technologies to build and interact with smart contracts on the Ethereum blockchain.

Internships

Front-End Developer at minic studio, Odorheiu Secuiesc

July 2020 — September 2020

- Design and develop a traveling web application for searching famous places, planning your stays and saving places to visit.
- Identify the problem the application will solve and define the target audience.
- Define the MVP features.
- Create a product backlog with user stories and prioritize them based on impact and effort

Education

BSc in Computer Science, Babeş-Bolyai University, Cluj-Napoca

Graduated on September 2023
